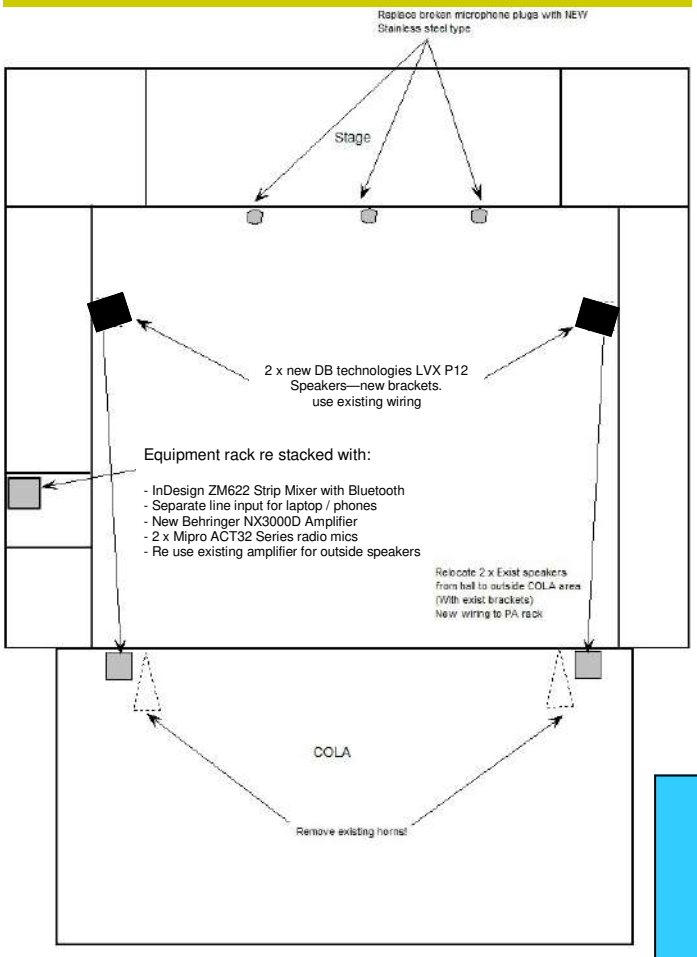
December 2025

B.E.R. HALL
DB Technologies
UPGRADE

Love them or hate them.. The NSW School Halls built around 2010 as part of the "BER" building program are now **approaching their 15th year in service.**

NOW is the time to embrace our unique **UPGRADE DEAL.** This gives you the best **new sound equipment** and yet still makes *use of your existing infrastructure* to create a great NEW system for a *fraction of the price.*



BER HALL
Typical system upgrade
2025

HOW DOES IT WORK??

Assuming your old speakers are still working OK, we **MOVE these OUTSIDE** to replace those horrible 30w external horns installed as part of the original BER specification.

We then install a set of **BRAND NEW DB Technologies speakers** in your hall to give you the best possible sound quality, right where you need it most.

To complete the upgrade, we rip out the 5 stack CD player and Cassette deck *(What WERE they thinking?!?)* and the old mixer and replace these with **MODERN equipment**.

To ensure reliability of your new system, we then replace the damaged XLR plugs on stage with new clip less plates and supply a set of brand new microphones and stands.

You KEEP your existing speakers and amp (now used for outside) *and the rack*. If required, we can also replace your radio microphones or you can keep using your old ones if they still work.

INCLUDES:

- Australian Monitor HSMIX2 6Ch mixer with Bluetooth
- 2 x NEW rechargeable Mipro ACT32 Series handheld cordless microphones with desk top charger
- Separate line input for mobile device
- **2 x DB Technologies LVX-P12 Speakers**
- Re use your existing speakers outside
- New Behringer NX3000D Power Amplifier

WITH FULL INSTALLATION

Typical Price around ~$6,000 + GST
